

Planting at Wildwood Cemetery

Please plant on either side or in the front of your monument—x's mark the acceptable spots.

If your monument is wider than 36" on a single lot (4'x10'), then you can only plant in the front of the stone.

If you have more than one lot, the monument typically goes at the top in the center. We ask that you still do plantings just around the monument.

Do not dump the displaced soil away from your lot.

Call ahead and ask the cemetery for a bucket. We will place the bucket at the gravesite for you to fill with any excess soil and then pick up it up after you are finished with your planting.

* If you are thinking about planting a bush or a tree, you must do this in consultation with Wildwood Cemetery General Manager. It is important that your choice be right not only for your lot, but the surrounding lots.

* All plantings must be done on your lot and next to your monument. Special permission can be granted to plant off of your lot.
